	1	CS Face Scan positioner w/o license	5941232
	1	Wrist 3D positioner for CS 9600 w/o license	5941240

Important reminder about cleaning methods for accessories

All accessories that come into contact with the patient mucosa must get a high level of sterilization after each use.

We recommend an autoclave cycle of 134°C (273°F) with a minimum 3-minute holding time and 2.1 bar (30.5 psi) overpressure.

Note

These accessories are consumable items and must be changed according to the number of sterilization cycles.
